- ✓ *Objectives*
- ✓ *Study Design/Methods*
- ✓ *Results & Discussion*
- ✓ *Conclusion*

Research Hypothesis

- *A voice-enabled Clinical search engine with point of care queries capturing tool to provide, fast, and efficient clinical information search as well as to promote reflective learning.*

Background

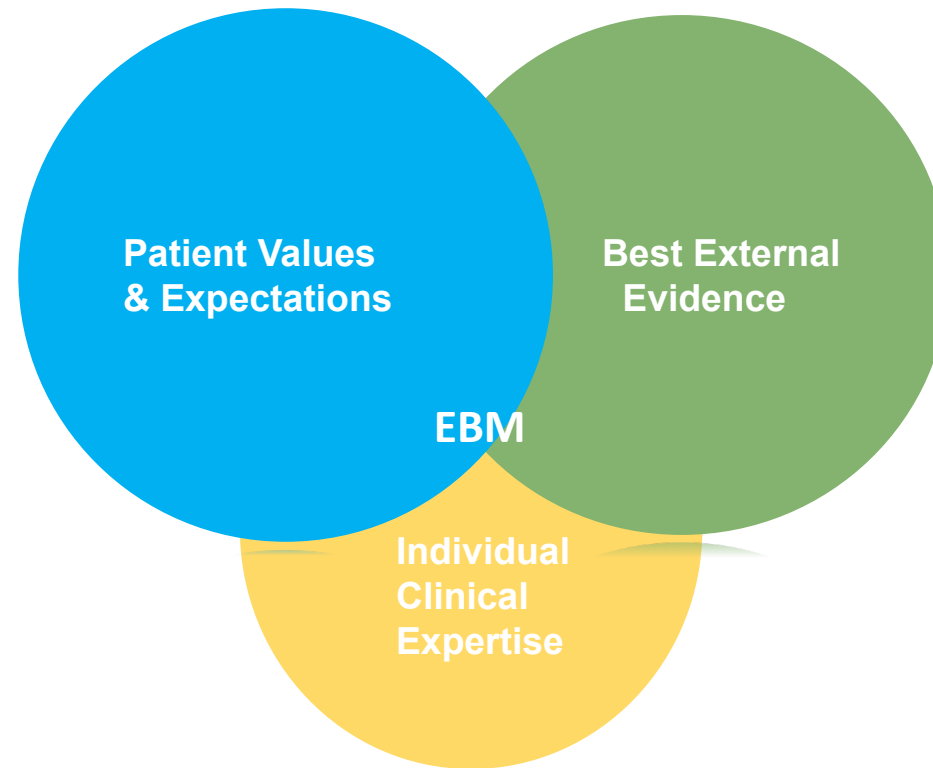

Healthcare professionals have patient related questions ¹

- *For every 2 patients, Clinicians have more than 1 question* ²
- *Lack of time (2-3 min/question) is the main barrier.* ²

Just in time answers to clinical question arising at point of care is an unmet need for effective Adult learning for Clinicians ³

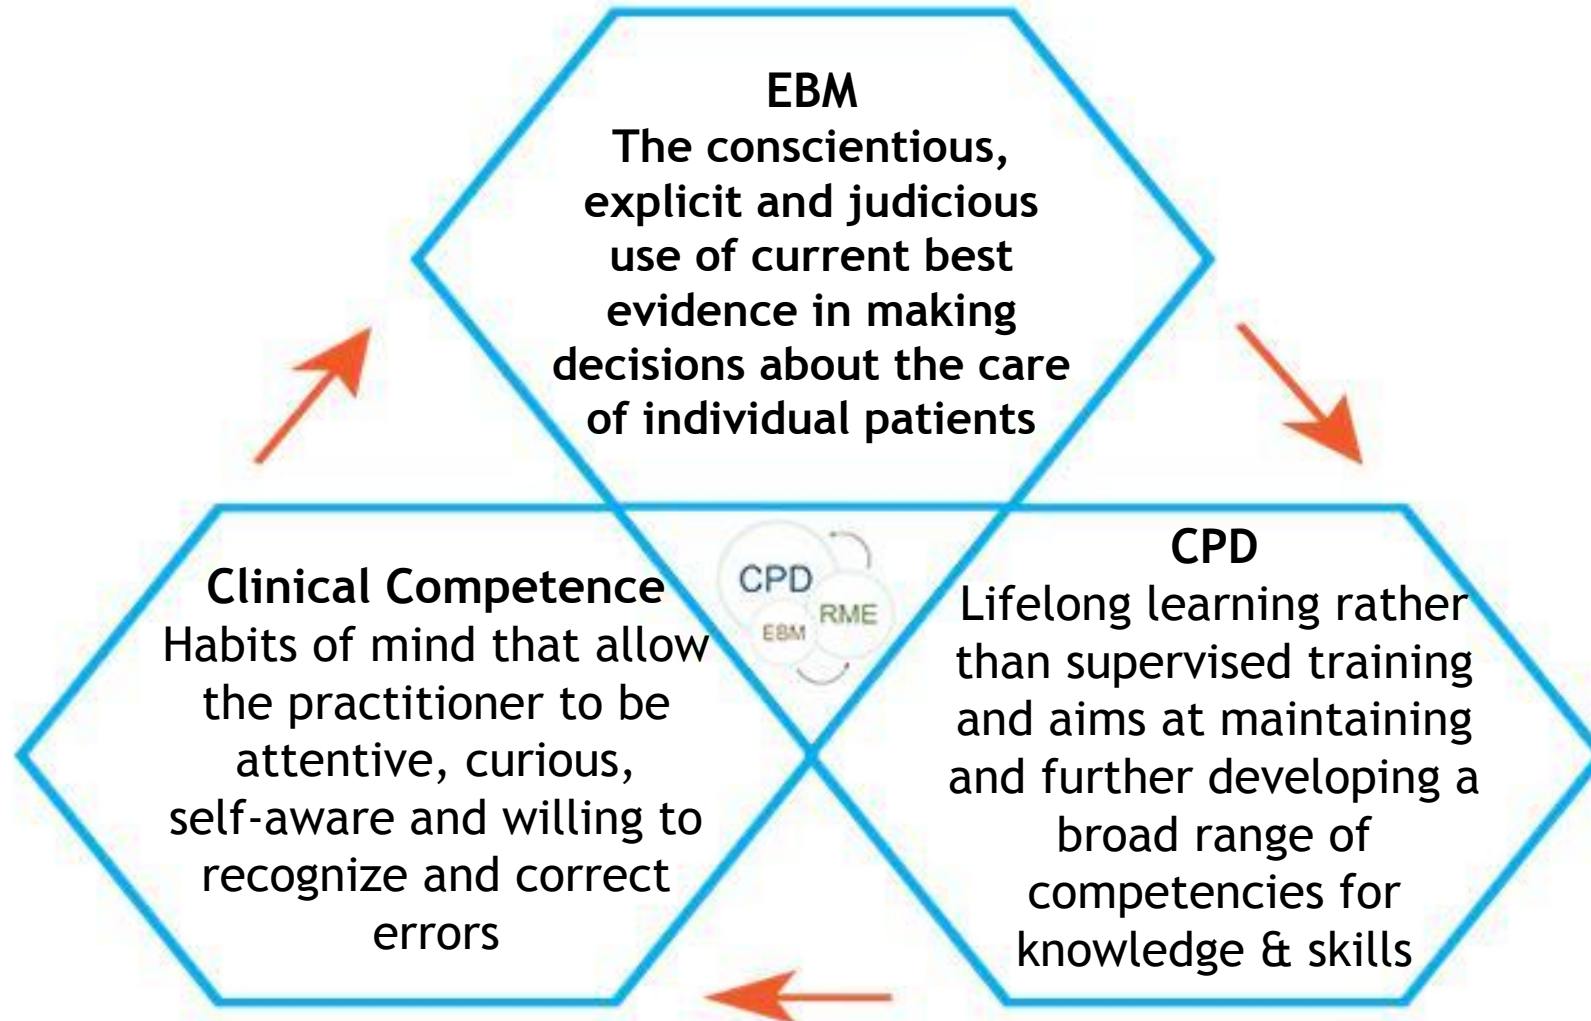

Evidence based vs Experience based?

Individual Clinical Expertise

EBM Triad

POC > EBM > Clinical competence > RME > CPD

Aims / Objectives

- **1. Voice enabled efficient search engine for busy Clinicians**
 - *Develop a point of care, voice enabled clinical search engine*
 - *To create a precise and concise point of care clinician information source base*
- **2. Point of care capturing tool for lifelong reflective learning**
 - *Develop a point of care clinical questions capturing tool*
 - *Develop a framework for a personalized decision support system for clinicians*

Participants and Setting:

Medical students: DIMC, Karachi, Pakistan

Sample size: (N=20)

Study Design

A Mixed Method Study

- Useability testing of a point of care, clinical search engine and Clinical query capturing tool for Clinicians
- Pre- and Post- test feedback about useability testing of app in efficient voice enabled search & clinical questions at point of care

Pre Course Survey - EBM SKills

Study Instrument

Clinical Pearl

- Clinical query-guided search engine
- Clinical query capturing tool
- Clinical knowledge repository
- Customized knowledge base
- Built in editorial flow
- Authentic knowledge based database

Study Procedure:

- Set up student user portals on Clinical Pearl
- Provide Application useability Clinical Pearl app training
- Randomly assign topics for searching and query development
- Collect and analyze user data with pre/post survey for application useability feedback.

Pre Course Survey - EBM Attitudes

Data Analysis of Post-Pilot Survey (N=20)

Evaluation Item:	Strongly Disagree	Somewhat Disagree	Neutral	Somewh at Agree	Strongly Agree
Clinical pearl app is an innovative idea for life-long personalized clinical expertise and professional development:	0	0	0	6(30%)	14(70%)
The voice enabled features on the app will save time at point of care i.e when dealing with patients:	0	0	3(15%)	6(30%)	11(55%)
I believe the clinical pearl app is a more time efficient way to look up information compared to traditional methods e.g textbooks:	0	0	2(10%)	2(10%)	16(80%)

Post course Survey results

Evaluation Item:	Strongly Disagree	Somewhat Disagree	Neutral	Somewhat Agree	Strongly Agree	M	SD
Clinical Pearl app will help me to capture point of care questions for continuing medical education:	0	0	0	5(25%)	15(75%)		
I believe the Clinical Pearl app can serve my personalized living Clinical decision support system:	0	1(5%)	1(5%)	7(35%)	11(55%)		
What new feature(s) would you like to see for the Clinical Pearl application?	<ul style="list-style-type: none"> ● Diagnostic lab camera scanner ● Links to source material ● Discussion forum ● More flexible search suggestions ● Quicker loading ● Medication tracking 						

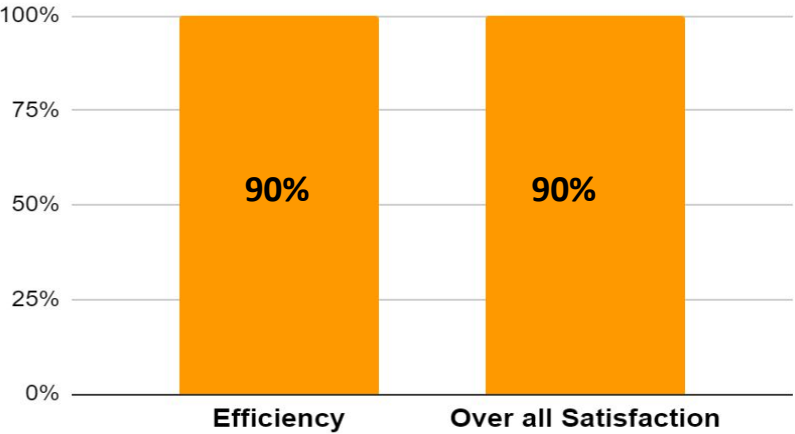

Post Course Survey - Summary Results

Clinical Pearl Usability Testing Results

Qualitative	
Failure cause/rate	5%
Erros description	Log in, Search not found,
Top comments	It took me minutes to complete my assigned tasks . All the keywords and information is a search away.
	My experience with clinical profile was excellent I am 100% satisfied
	The application was generally useful and provided concise information on certain topics

Clinical Pearl: A Lifelong Personalized Knowledge Base

- 100% agree that this app is an innovative idea for life-long personalized clinical expertise and professional development

Clinical pearl APP is an innovative idea for life-long personalized clinical expertise and professional development

20 responses

Clinical Pearl: A Voice-Enabled Time-Saving Instrument

- 90% agree that the app's voice-enabled features will save time when dealing with patients.

The voice enabled features on the app will save time at point of care i.e when dealing with patients
20 responses

Clinical Pearl: Time Efficiency

- 90% agree it is a more time-efficient way to look up information compared to traditional methods.

I believe the clinical pearl app is a more time efficient way to look up information compared to traditional methods e.g textbooks

20 responses

Clinical Pearl: Filling Knowledge Gaps

- 90% believe this will help to capture patient-related questions to fill knowledge gaps for reflective learning.

I believe the Clinical Pearl application will help me to capture my patient-related questions to fill my knowledge gaps for reflective learning

20 responses

Clinical Pearl: Point of Care Query Capturing

- 100% believe the app will help to capture point of care questions for continuing medical education (CME)

Clinical Pearl app will help me to capture point of care questions for continuing medical education (CME)

20 responses

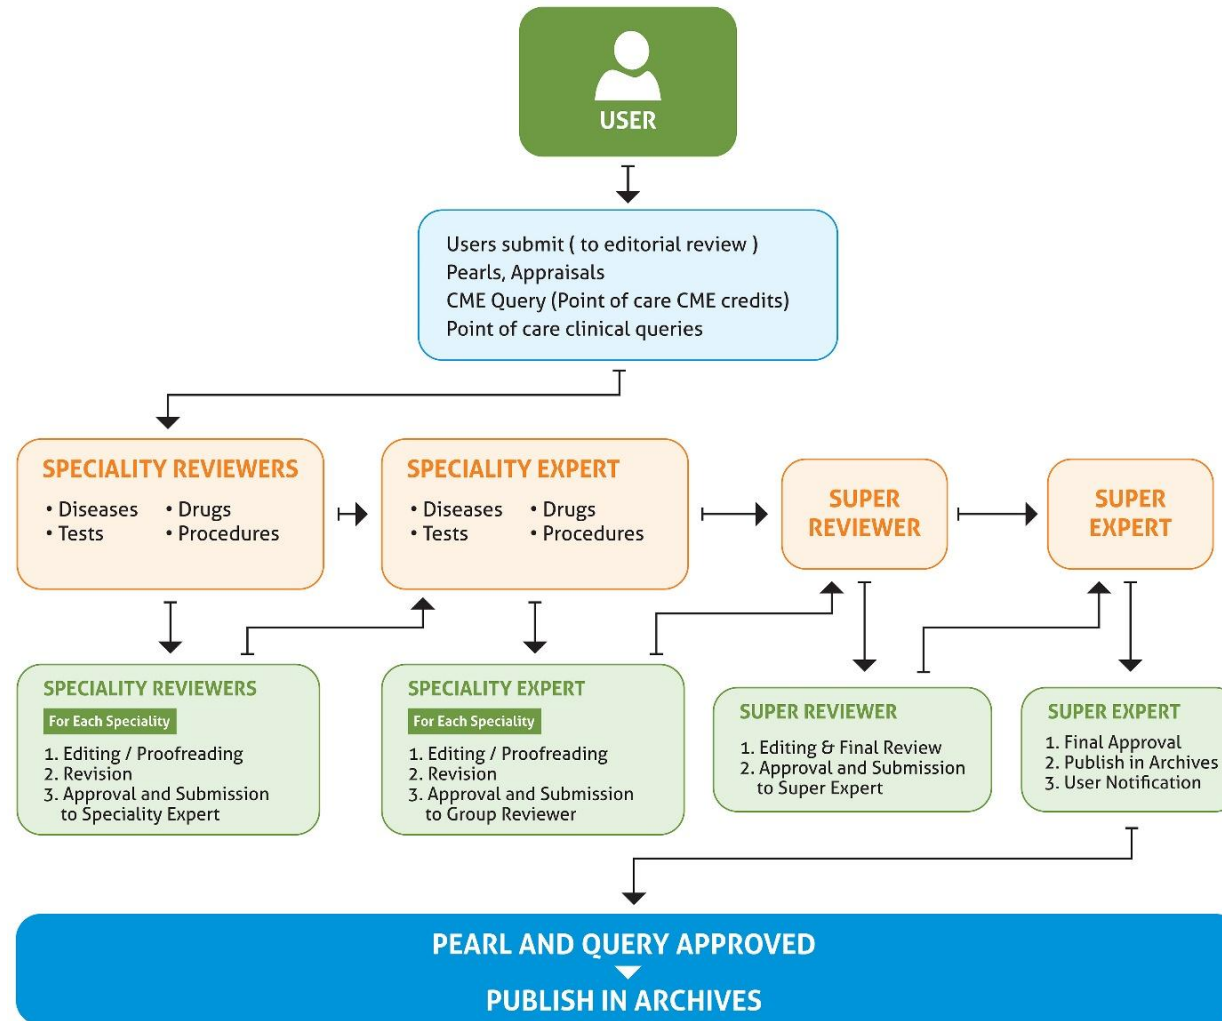

Clinical Pearl: Personalized Clinical Support

- 90% agree that the app can serve their personalized living clinical decision support system

I believe the Clinical Pearl app can serve my personalized living Clinical decision support system
20 responses

Editorial workflow

Conclusions

- Successful implementation of a personalised voice-based, clinical search engine and question capturing tool
- Pilot users were highly satisfied that the app may serve as a lifelong knowledge repository for self-directed learning
- Clinical Pearl app may help to organize the most important commodity of physicians own; **Clinical Experience**

Further Work

- Role of clinical pearl in providing granular insights about clinician's daily clinical knowledge needs
- All healthcare professionals (PA, NP, nurses, physical therapists, pharmacists and dentists)
- Role of clinical pearl in providing granular insights about clinician's daily clinical knowledge needs
- Impact of clinical pearl in enhancing self-directed learning activities and professional competence.
- Infobutton integration with EHR to poc access to Clinical Pearl to clinicians

Limitations

- ✓ Limited user group
- ✓ Lack of proper funding (Private venture)
- ✓ Cost & time for large sample size management
- ✓ Application stability and scalability
- ✓ Lack of formal Software application training environment
- ✓ Users that were not computer savvy might have been discouraged
